ABDUL SUBAN MOHD ISMAIL SHAIKH

+91 7208718064 | suban14925@gmail.com | Suban2108

SKILLS

- Fundamentals: C, C++, Python, Java, JavaScript.
- Front-End: HTML, CSS, React, JavaScript.
- Backend : NodeJs, ExpressJs.
- Databases: MySQL, PostgreSQL, MongoDB Atlas, Firestore.
- Tools : PostMan, Git & Github, Firebase, ShadCn UI, JIRA.

WORK EXPERIENCE

Lonely Bag Food Rescue Pvt Ltd: *[Worked as a Typescript Intern]*

- Worked closely with a seasoned engineering team to design, develop, and deploy a full-fledged cross-platform Website application using Typescript from the ground up.
- Actively contributed to all stages of the development lifecycle : ideation, architecture design, UI/UX, coding.
- Ensured the application followed best practices in state management and API integration
- Played a key role in team collaboration, code reviews, and sprint planning, gaining valuable exposure to real-world agile workflows.

PROJECTS

Items-Barter Website Application (Swap-Circle): *[Personal Project]*

- A efficient platform enabling private item bartering and donation with the invite-only user's circle.
- It consist of Chat system one-to-one & one-to-group integrated with barter/donation thread and user session.
- Introduced the system of Karma points(Score) to reward item swaps and event participation.
- Technologies used: React, NodeJs, ExpressJs, MongoDB Atlas, Tailwind CSS, ShadCn UI.

Agriculture Website Application (Seed-Connect): *[Worked as a full stack developer]*

- Developed a full-stack web platform aimed at bridging the gap between farmers and retailers by enabling direct transactions, eliminating intermediaries, and ensuring fair and transparent crop pricing.
- Integrated the RazorPay to enable seamless transactions between farmer and retailer
- Utilised MongoDB Atlas for efficient cloud-based database management, ensuring high availability & Scalability of data
- Technologies used: React, NodeJs, ExpressJs, Mongo DB Atlas, ShadCn UI.

Food Delivery Website Application (.Tomato): *[Worked as a full Stack developer]*

- It is an Optimised food delivery website with dynamic items listing & add-to-cart functionality.
- Integrated with Stripe payment for seamless and secure payment transaction for customer
- Developed **Admin UI** for adding and managing items, with real-time updates reflected on the client side, and implemented order management functionality.
- Technologies used: React, NodeJs, ExpressJs and MongoDB Atlas.

Innovate Sphere Tech : *[Worked as a Backend developer]*

- Developed and maintained RESTful APIs using **Node.js** and **Express.js** for product management, user authentication.
- Implemented a recommendation system to enhance user experience and improve product discovery.
- Ensured secure and optimized server-side operations, improving application performance and scalability.
- Technologies used: HTML, CSS, JavaScript, NodeJs, ExpressJs, MongoDB.

EDUCATION

Mumbai University (Thadomal Shahani Engineering College) **2026**
B.E. in Computer Engineering
Current C.G.P.A: 8.4

Maharashtra State Board - (HSC) (SIES College of Arts, Science & Commerce) **2022**
Computer Science Bifocal
Percentage : 81.50%
